

## Capabilities Statement

[www.artcrystalld.com](http://www.artcrystalld.com)

Founded in 1986, the mission of Art Crystal Ltd. is to bring a variety of high quality glass, crystal pieces and drinkware, that are enhanced by a logo or message, for use as awards, advertising specialties, and premiums.

Our experienced and knowledgeable people understand your marketing, logistical and budgetary challenges, and can provide solutions that will meet your needs. We are capable of meeting even the most demanding schedule. Our state of the art facility gives us the flexibility to decorate our products by several different methods, including sublimation, laser engraving, deep engraving and color filling. Our team of artisans have been designing and producing beautiful glass awards for over 30 years. For full color sublimation products, we offer an exclusive technology that allows us to fuse a colored digital image to flat or curved glass with unmatched clarity and fidelity. When the piece is held up to a light source, similar to stained glass, the piece seems to illuminate from within.

We are committed to making each encounter with our clients a joyful experience, and we look forward to the opportunity of partnering with you and your team on your next project.
