The Learner Card program begins with training material you provide or you can choose from one of our stock HSE topics.

AIM will create a custom folded learner card that provides the training material for the employees to review as is or in conjunction with their typical safety meeting. Once the material is reviewed, the employee will answer four simple true (T) or false (F) statements by scratching the corresponding box to the right of the statement.
Enhance and reinforce important safety topics with Learner Cards.

The scratched answer will reveal if the employee answered the statement correctly. If the employee answered incorrectly, the employee can turn the card over and write the correct answer on the back. This will provide an opportunity to reinforce the correct information to the employee.

The Learner Card program can be supported with print material such as flyers (digital or printed), presentations, banners, posters and table tents to provide focused awareness on the HSE topic being covered. Reward gifts can also be provided for all employees who participate and turn in their cards, or you can perform a drawing with the participants cards.

Simple Steps:
1. Conduct a Safety Meeting
2. Distribute Learner Cards
3. Participants return completed card to designated area
4. Rewards are distributed to those who turned in a completed card or those selected from drawing
